

# ArmorLite™

For many years Seismic Exploration Companies have looked for a solution to keep their seismic crews working in conditions where small animal and rodent bites have shut them down. Steward Cable Inc. has designed a cost effective solution to expensive conventional armoring of cables and has found a solution ensuring the crew's productivity through ArmorLite™ protected cables.

Seismic Crews using cables protected with ArmorLite™ have seen their production in these areas improve tremendously. Another benefit for cables using Armor Light is the crush factor which should improve cable life in areas where multiple road crossings are encountered.

- Key Benefits:

- Low cost solution to conventional Armoring

- Improved Crush Factor

- **Light Weight** Only 7 lbs per 1000 ft length on a .340" OD cable

- Bend Radius of 2 inches "**Very Flexible**"

- Cable sizes from .250" to .500"

- Durable polyurethane jacket with UV stabilizer

- Abrasion Resistive Protection for inner cable bundle

- Operational Temperatures -40 Celsius to + 70 Celsius

Crossover too many other industries:

- Aerospace

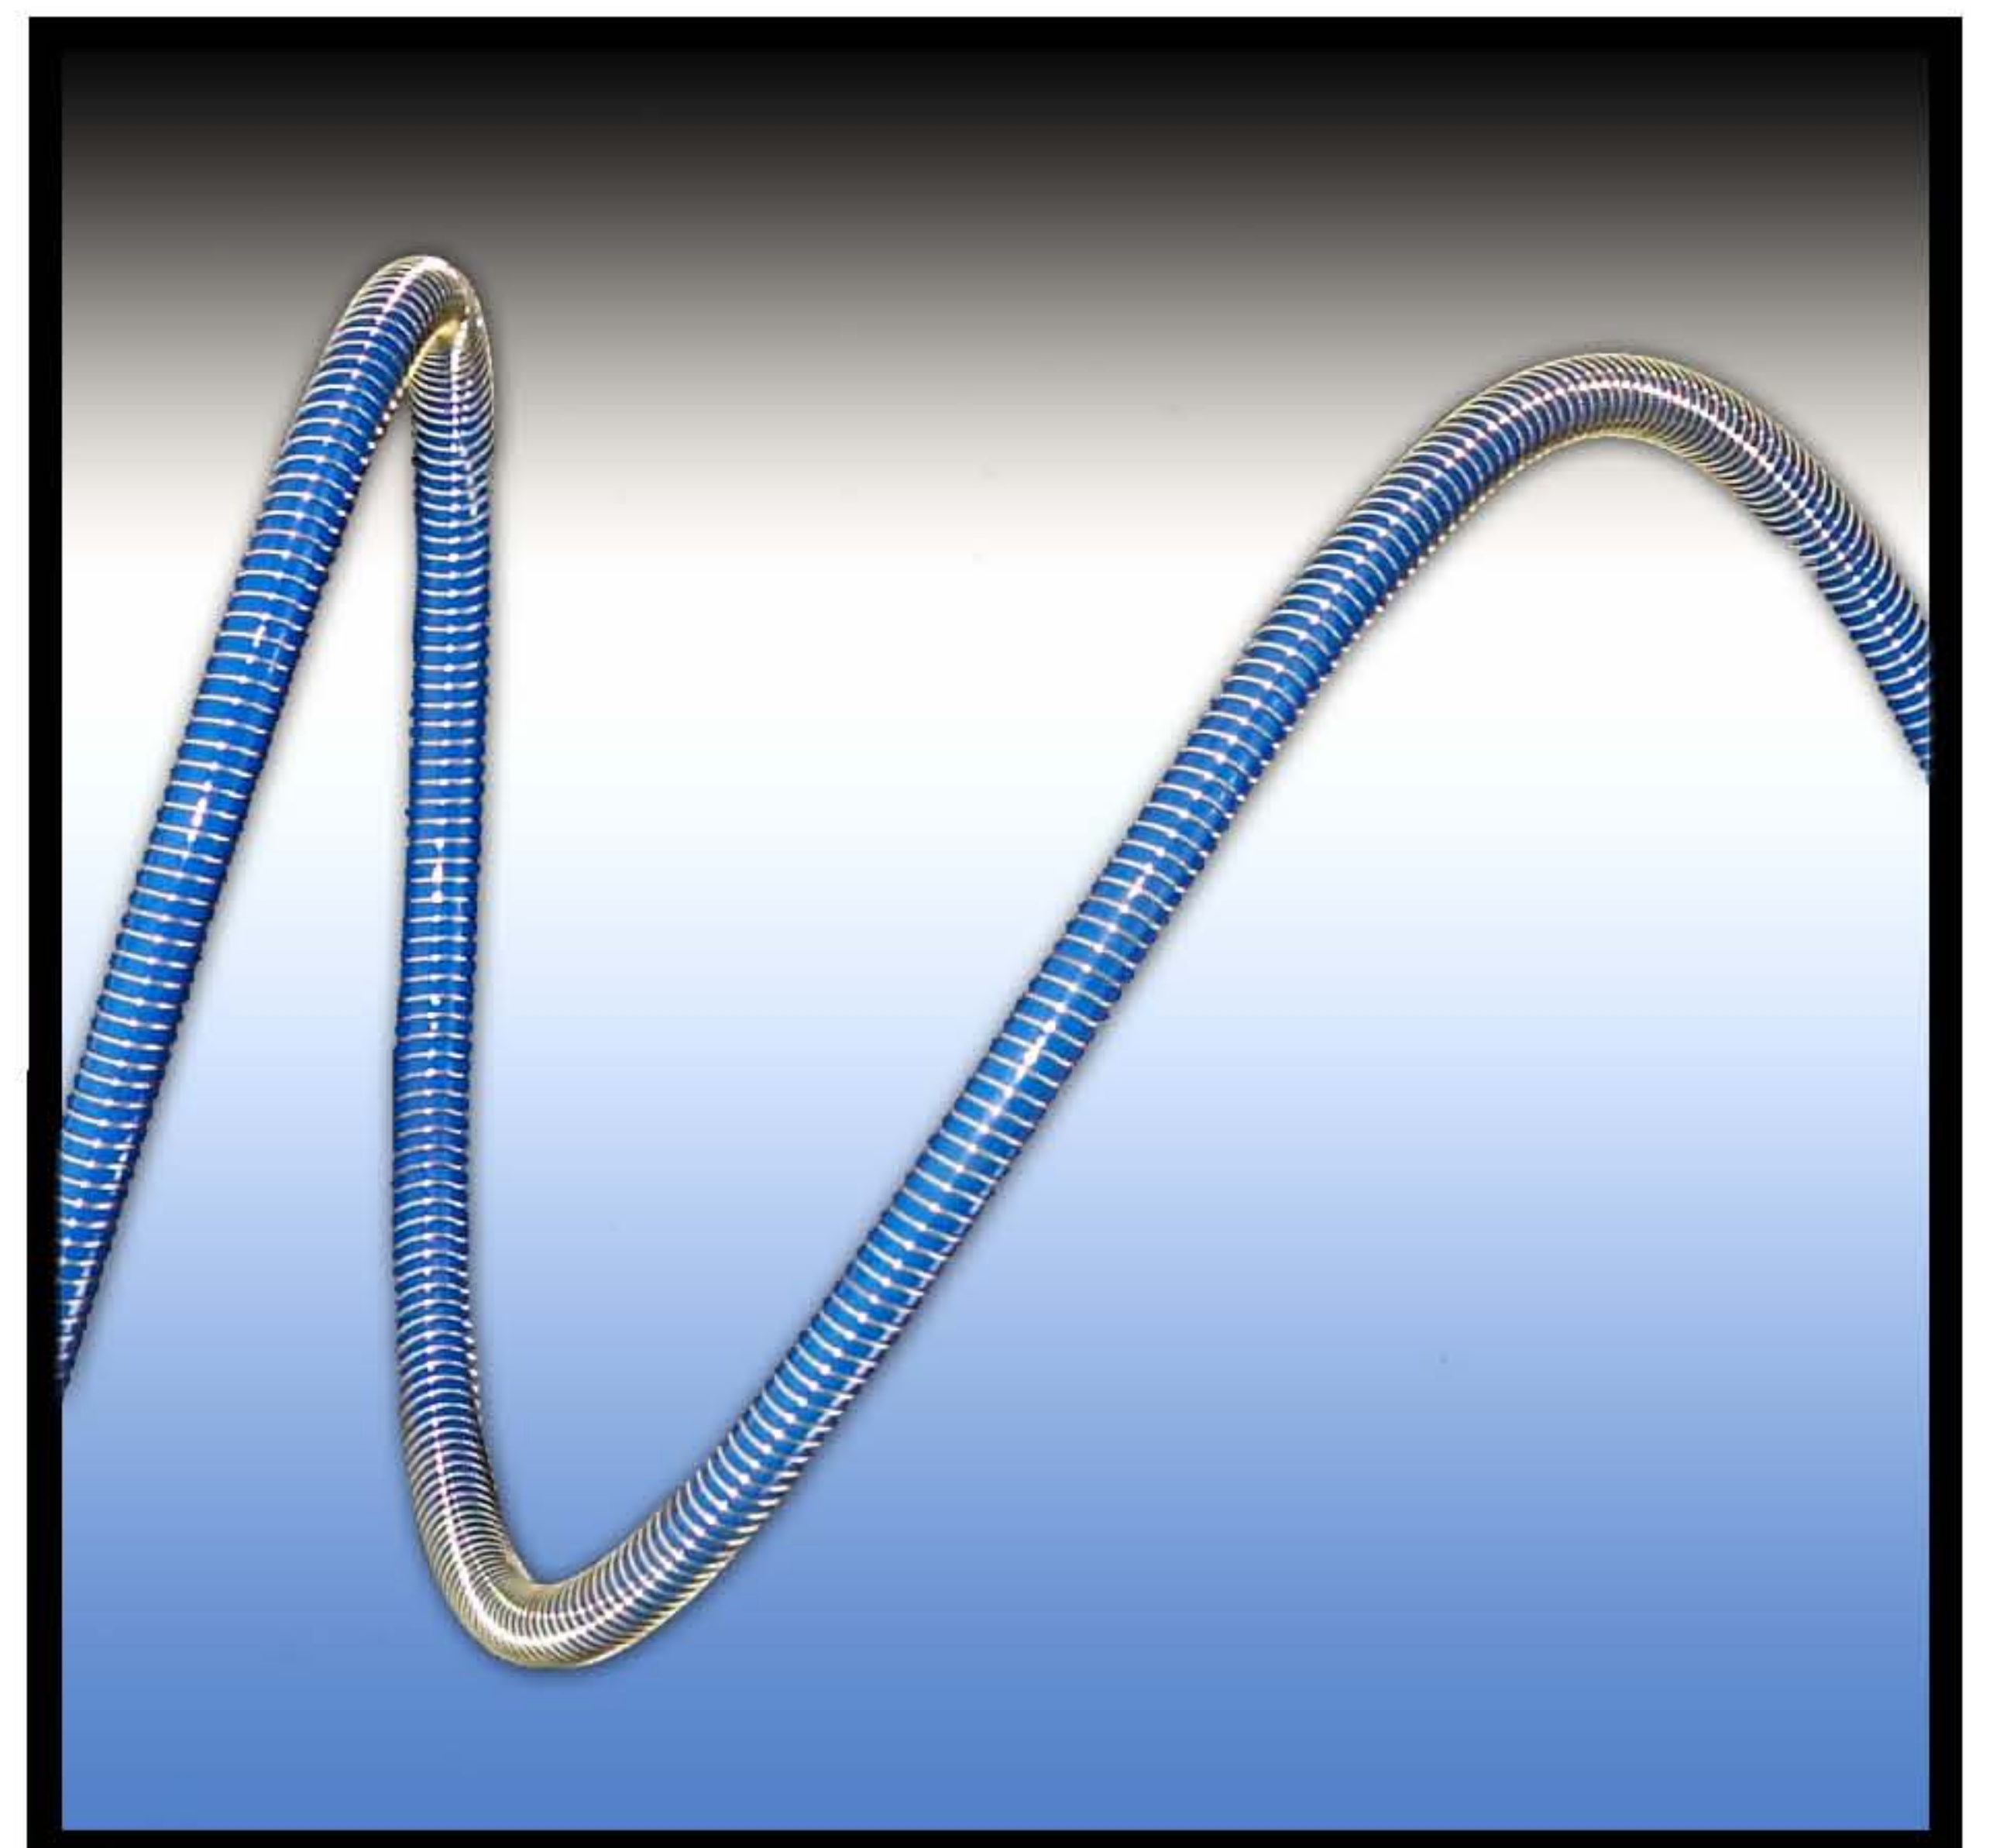

- Military

- Industrial

- Oil & Gas

- Heavy Equipment
